PU application belt (built to order)·

ORIONTEK
ENGINEERING GOOD SOLUTIONS

01 CONSTRUCTION

TOP COVER	Material	**Rubber or polyurethane to suit**

PU — ONE LAYER
homogeneous, no fabric

CROSS-SECTION — NOT TO SCALE

03 APPLICATION

Our truly endless or open roll belts are specifically designed for crop harvesters of root vegetables and other plant harvesting machines. Primarily found in the production of radish, carrots, celery, beets, turnips, parsnips, and leek with a dirt hopper system, our Harvester Belts can also be found in use at flower and tree nurseries, along with industrial harvest machines. Depending on the application, our cord or ply-structured belts will ensure low elongation and high tension to ensure th

Oriontek service: supplied endless-joined, open-length or fabricated with profiles, sidewalls, cleats and V-guides. Onsite splicing available.

NOTES (1) Operating the belt at its limit values may reduce service life. (2) Minimum pulley diameters depend on belt tension and on the splice or fastener specified by Oriontek.

DISCLAIMER Values are nominal. They describe the product as tested and do not necessarily reflect conditions of industrial use, nor do they guarantee suitability for a specific application. The customer remains responsible for correct selection and use. Oriontek cannot be held liable for damages arising from use of this product. Specifications may be revised without prior notice.
